

Leaders in 3PL technology and systems.

Originally established as a technology leader in distribution, IQ maintains that leadership with the systems hardware and software required to meet the critical needs of Third Party Logistics customers for efficiency, accuracy and reporting for cost-effective, lean supply chain management.

We have made the investment necessary to deliver the industry's best practices and employ the best technology to ensure rock-solid supply chain management solutions for our customers.

IQ Guarantee

We can guarantee the accuracy and timeliness of our deliveries because we have more resources available—more driver agents, a wider area of coverage and better technology and processes for dispatching, tracking and communicating.

IQ is real-time and high touch through to the last mile.

3PL is a range of specialized distribution and warehousing and fulfillment services which bring increased efficiency and responsiveness to supply chain management for organizations with extensive, time-sensitive logistical needs. IQ is a proven *high touch*—*high tech* Third Party Logistics provider and last mile fulfillment distributor in the southwestern U.S.

Cross Docking

Cross Docking is the practice of unloading materials from an incoming semi-trailer truck and loading these materials directly into outbound trailers or trucks with little or no storage in between. Cross docking requires close synchronization of all inbound and outbound shipment movements. By eliminating the put-away, storage and selection operations, it can significantly reduce distribution costs.

Whether your cross-docked shipment is going out in bulk to another distribution point (*e.g., a retail store*) or is broken down into items to be delivered last mile direct to individual end users, IQ can handle all your last mile shipments accurately and efficiently.

Last Mile Direct

Last Mile Direct refers to completing deliveries which originate from a distribution center to individual, local recipients. Typically, goods and materials arrive in large trailer-truck shipments which must be broken down and transferred to delivery vehicles more suitable for urban and suburban streets for final delivery.

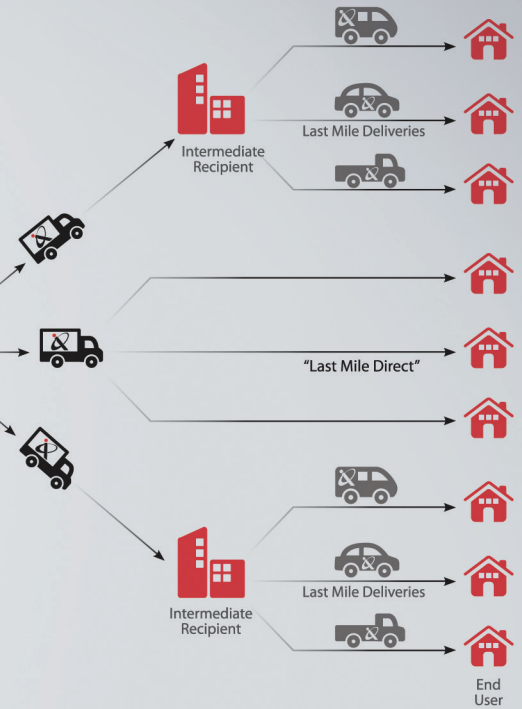

Fulfillment

Fulfillment involves holding inventory for a national manufacturer or distributor in order to make just-in-time deliveries to their local customers more cost-efficiently.

Multi-Location Distribution
within Southwest Major Markets

Cross-Dock / Warehouse
Phoenix, AZ

3PL Warehousing

3PL Warehousing is available utilizing either traditional or customized services, whatever it takes to optimize supply chain logistics to get your goods where they need to be.

IQ's 100,000+ square foot main 3PL fulfillment warehouse has more than 20 docks to expedite any size shipment in or out. We offer 3PL, supply chain management and a myriad of last mile services at each of our locations.
